Dear Sirs

**ENGINEERING WORKS WITHIN
ROAD STRUCTURES SAFETY ZONE ("RSSZ")**

1. During our public seminar held on 19 March 2003, we have conveyed to the professional in the construction industry the requirements on engineering works proposed to be carried out within the Road Structure Safety Zone ("RSSZ").
2. Road Structure Safety Zone is defined as the part of lands or areas that are 20m from the outer most edge of any part of a road structure. Whereas road structures are defined to include any bridge, underpass, road tunnel, earth retaining all and ancillary buildings, such as sub-stations and pump houses serving roads, tunnels, control centres for road tunnel operation.
3. The objective of regulating works within RSSZ is primarily to safeguard the stability, integrity and serviceability of the road structures. It is similar to what we have been doing currently to safeguard the Rapid Transit Systems.
4. The requirements on engineering works within RSSZ are stipulated in chapter 10 of our publication "Street Works Proposals Relating to Development Works", which is available in the CORENET e-Information web site. It is also available on sale in CD-Rom where order can be made via LTA One-Motoring web page.
5. I would appreciate it if you could disseminate the above information to the members of your organisation.
6. Thank you.

Yours faithfully

GOH KOK HWA
