Dear Sir,

MAINTENANCE OF STREET LIGHTS

- 1 Prior to June 2002, PowerGrid (PG) was managing the public street lighting works for LTA. PG designs, implements, and maintains the entire street lighting works for LTA and external developers. In the design, the street lighting earthing system was tied to PG's own earthing network.
- 2 In June 2002, LTA took over the maintenance of public street lighting. Subsequently, PG requested LTA to separate the entire street lighting earthing system from its earthing network, including those previously implemented by PG. LTA has thus required developers to provide separate earthing system for streetlights before handing over to LTA for maintenance. In addition, to facilitate the future maintenance of the streetlights, the developers are also requested to submit single line drawing and as built layout drawing of the streetlights in the hand over.
- 3 REDAS has requested LTA to waive the requirement to separate the street lighting earthing system and to provide single line drawing and as built layout drawing of the streetlights.
- 4 LTA has reviewed the request and would like to inform you that streetlights completed before June 2002 by PG would be exempted from the requirement to provide separate earthing system, single-line drawing and as built layout drawing.
- 5 I would appreciate it if you could convey the contents of this circular to the relevant members of your organisation.

Yours faithfully

GOH KOK HWA
MANAGER
DEVELOPMENT & BUILDING CONTROL DEPARTMENT
