2 The deviation forms are to provide a clear channel for QPs and PEs to surface alternative designs that may deviate from PUB's requirements for management decision. QPs are to include all relevant technical information and any mitigating measures that will be implemented in the submission. Please note that the decision from the Board is considered **final** and subsequent applications without new technical information would not be considered. The PUB-SEW-PCWVSEW is to be used for pre-consultations applications only.

3 The PUB-TOP-CLR and PUB-CSC-CLR forms is to obtain PUB's no objection before applying for BCA's TOP and CSC clearances. QPs and PEs are to attach all necessary drainage and sewerage TOP/CSC clearances with the form. The forms are introduced to provide better tracking of requests and queue management and will replace the current process of request through email. Email requests will cease on 1st January 2019.

4 The typical response time for the above submissions will be within 14 working days. QPs and PEs are advised to plan out their work in accordance with their project timeline and to make their submissions early to avoid delays.

5 Please refer to Annex for the new forms.

6 Should you have further queries on the above changes, please contact PUB at pub_bpu@pub.gov.sg or PUB's hotline at 67313512.
