

**Webinar:
SS 550 : 2020 Code of Practice for
Installation, Operation and Maintenance
of Electric Passenger and Goods Lifts**

8 January 2021
3.00pm – 5.00pm

ABOUT

The Webinar will provide key updates on the revised Singapore Standard SS 550 : 2020.

SS 550 specifies the safety rules for permanently installed new passenger or goods lifts, with traction or hydraulic drive, serving defined landing levels, having a car designed for the transportation of persons or goods or persons and goods, suspended by ropes or jacks and moving between guide rails inclined not more than 15° to the vertical.

In addition to the requirements of this standard, supplementary requirements shall be considered in special cases (e.g. use of lifts by persons with disabilities, in the case of fire, potentially explosive atmospheres, extreme climate conditions, seismic conditions, transporting dangerous goods, etc.).

SS 550 also aligns the operations for emergencies, evacuations and fire lifts to provide consistency and harmonise with the Fire Code.

WHO SHOULD ATTEND

Manufacturers and suppliers, architects, professional engineers, authorised examiners, technicians, contractors, consultants, testing laboratories, inspection bodies, and academic institutions.

WEBINAR HIGHLIGHTS

- ✓ Learn more about the key changes made to the SS 550, such as additional clauses on requirements using a mechanical device for goods lift (traction type).
- ✓ Hear from the Building Construction Authority (BCA) on the regulatory regime on Interim type-testing requirements.
