Synopsis

Geberit is constantly setting **new standards for safe sanitary drainage technology** through its development work. In more than 100 years of hydraulics expertise, Geberit have accumulated a wealth of knowledge and experience in flow engineering that no other company can match.

Geberit **SuperTube technology** is based on the perfect interplay between system components, which enables waste water systems to be installed in a particularly space-saving manner in high-rise buildings. SuperTube means a parallel ventilation pipe is no longer required, creating more space for the residential and floor space.

Programme

Contents line-up		Speaker
14:00	Registration	

14:05 to 15:25 (80 mins)	• Company Presentation
	  ➢ More than 150 years of experiences
	• Basic of Hydraulics
	  ➢ Understanding and knowing Sanitary Plumbing System
	• Types of system
	  ➢ Different Types of Sanitary Plumbing System and Characteristic
	• Calculation according to EN norms
	  ➢ Hydraulic Calculation
		Mr. Manuel Balmer
		Mr. Akhilesh Chaudhari

15:25 to 15:40	Tea Break (15 mins)	

15:40 to 17:30 (110 mins)	• Introduction of HDPE & SuperTube
	  ➢ What is HDPE and it's Characteristic?
	• Installation (Practical session)
	  ➢ Jointing Technique for HDPE
	• Q&A
		Mr. Manuel Balmer
		Mr. Akhilesh Chaudhari

17:30	End of Seminar After-seminar networking event, from 6pm to 7.30pm	

The Speakers

Mr. Manuel Balmer
Head of Engineering, North & Southeast Asia
Geberit private Ltd. Singapore
(with more than 18 years of experiences)
